

EasyCatalog 16.0.1

Enhancements

The following enhancements have been made to EasyCatalog and are available in the latest release on our web site. Maintenance customers can receive a version of EasyCatalog containing these modifications for an earlier version of InDesign by contacting us via the web site. Please be aware though that its not always possible to include all new features in previous versions.

EasyCatalog

ID	Summary/Description	Date
2700	new LUA function HTTP get with headers	2020-10-26
	new LUA function HTTP get with headers. example : response_code_ response_body_ response_headers = HTTP.getwithheaders(url)	

EasyCatalog - LUA Commands

ID	Summary/Description	Date
2718	Added new utility function split to split a string	2020-11-17
2710	added TABLE getstyle()	2020-11-09

EasyCatalog - File Data Provider > Google Sheets

ID	Summary/Description	Date
2705	Now supports retrieving more than 1000 sheets from Google Drive	2020-11-04

EasyCatalog - Pagination Module > Formatting Rules

ID	Summary/Description	Date
2707	New feature to export all Rules in a Rule Set to a folder as snippets	2020-11-04
	New feature to export all Rules in a Rule Set to a folder as snippets - this is available when right-clicking on a Rule Set in the Formatting Rules panel.	

EasyCatalog - Scripting Module

ID	Summary/Description	Date
2717	Add access to TextLinks via scripting using story or document objects.	2020-11-23
	Add access to TextLinks via scripting using story or document objects. Example: textLink = app.activeDocument.stories.item(n).textlinks.item(n); Example: textLink = app.activeDocument.textlinks.item(n);	

Bug Fixes

The following bugs have been fixed in this release of EasyCatalog. For clarity, the bug reports listed below show the original problem as reported. It is often not possible to detail the fix for each issue as they involve internal changes to EasyCatalog. Note that some bugs listed here refer to issues that were encountered with new features in the beta version by our beta testers and are included here for completeness.

EasyCatalog

ID	Summary/Description	Date
2725	Barcodes not being generated if the string being encoded contains low ASCII characters	2020-12-03
	Barcodes not being generated if the string being encoded contains low ASCII characters.	
2724	Tooltips do not always appear in the panel	2020-12-02
2720	Import Data Source failing to import Relational data sources	2020-11-18
2719	Importing field options file can change case of field names	2020-11-17
	Importing field options file can change case of field names_ which can result in image previews not being displayed. This can also affect the list of fields presented in field name pop-ups.	
2713	Formatting Rules filters not working correctly with floating point values	2020-11-10
2709	Create Merged Document guides bug.	2020-11-06
	Create Merged Document operation includes guides for each record cell. guides should be excluded.	
2703	"About" dialog graphic is being displayed in the wrong location on a HiDPI display on Macintosh	2020-10-30
2701	Tool Tips not working properly	2020-10-27
	Tool tips would only be displayed when the cursor enters the widget. This is change Adobe made as the default behaviour so needed a workaround	
2702	Crash when selecting an empty table cell and inserting a field	2020-10-27

EasyCatalog > Combined Data Sources

ID	Summary/Description	Date
2696	Combined data sources not being persisted correctly	2020-10-22
	A relationship set to "All" records will sometimes be read back in as being a 'condition' with no conditions underneath_ which results in no records being imported.	

EasyCatalog - LUA Commands

ID	Summary/Description	Date
2722	CELLL:copyformatting not copying the correct cell style	2020-12-01
2723	CELL:setrowheight now sets an exact cell height_ not a minimum	2020-12-01
2712	calling setcontent in createformattedcontent.lua would crash	2020-11-10
	Now raises an error indicating the operation is illegal.	
2697	FRAME.duplicate now takes an optional cell parameter	2020-10-26

	An optional CELL parameter can be passed and is used to populate the duplicated frame.	
2698	Table column option 'fittotext' not being applied	2020-10-26
	Table column option 'fittotext' not being applied when a zero minimum width or maximum with are specified. Passing zero as the minimum or maximum width will now result in the minimum or maximum allowable values being used instead.	
2699	"calling 'setcolwidthoption' on bad self" when minimum or maximum column parameters not specified	2020-10-26
	"calling 'setcolwidthoption' on bad self" when minimum or maximum column parameters not specified for 'setcolwidthoption' method.	

EasyCatalog - File Data Provider > Google Sheets

ID	Summary/Description	Date
2704	Column names that contain illegal control characters cannot be updated using Update Data Source	2020-11-04
	Column names that contain illegal control characters cannot be updated using Update Data Source. If the key field column(s) contain illegal control characters_ this can prevent any field for the record from being updated.	
2706	Errors returned by Google were not always displayed correctly	2020-11-04

EasyCatalog - Pagination Module

ID	Summary/Description	Date
2721	Apply Swatch to Text From Field not being applied when dragging and dropping from an EasyCatalog Library	2020-11-20

EasyCatalog - Pagination Module > Formatting Rules

ID	Summary/Description	Date
2726	Incorrect Rule Set name sometimes displayed when editing a Rule Set	2020-12-04

EasyCatalog - Pagination Module > Guide-based

ID	Summary/Description	Date
2708	Column headers being inserted twice on new pages	2020-11-05
	Items that have "Repeat For" set to "Once Per Column" are being inserted twice when moving to a new page.	

EasyCatalog - Scripting Module

ID	Summary/Description	Date
2711	Fixed an issue with setFieldOption that would not set tabularxsl and tabularla options	2020-11-10
	myDS.setFieldOption("moods_localized_xml"_ "tabularxsl"_ localestring);	

EasyCatalog 16.0.0

Enhancements

The following enhancements have been made to EasyCatalog and are available in the latest release on our web site. Maintenance customers can receive a version of EasyCatalog containing these modifications for an earlier version of InDesign by contacting us via the web site. Please be aware though that its not always possible to include all new features in previous versions.

EasyCatalog

ID	Summary/Description	Date
2693	Panel Filtering now allows tabular field to be checked for 'empty' and 'not empty' values	2020-10-20
2686	Added support for GS1-128 barcodes	2020-10-05
2687	Added support for EAN14 barcodes	2020-10-05
2682	Cosmetic fixes for Information dialog	2020-09-21
	Cosmetic fixes for Information dialog - improved spacing between items_ fixed truncation of last synchronisation date	
2674	If EasyCatalog demo has expired when running under InDesign Server_ an error will be output to the error log	2020-09-04
2670	Cell Finder now matches key values case insensitively	2020-09-02
2668	Adopt now tries by removing control characters from links in the document if it fails a direct match on the key	2020-08-27
2665	Commands DATASOURCE:encryptlua(key) and DATASOURCE:decryptlua(key) to indicate if encryption key is different.	2020-08-19
2663	Added "Remove..." button to Table > Filter dialog	2020-08-18
	Added "Remove..." button to Table > Filter dialog to remove the filter applied to the table.	
2664	Returning empty data source and key value from XML tag adoption LUA will now insert a field specifier	2020-08-18
2662	Added new Advanced option that will hilight the fields selected in the document	2020-08-17
	"Hilight Document Selection" added to show the documents selected fields.	
2639	Versions panel now only shows versions relating to the current search criteria	2020-07-14
2643	Enabled Alt-click in the formatting rules panel for range selection	2020-07-14
2635	Added 'Filter...' menu option to Table menu	2020-07-06
	Added 'Filter...' menu option to Table menu that allows the user to define a filter that is applied to the records being used to populate the table.	
2634	"Data Source Templates" folder is now automatically created	2020-07-01
	"Data Source Templates" folder is now automatically created on startup if a new workspace folder is created.	
2633	Added support for footnotes in formatted fields	2020-06-26

	Added support for footnotes in formatted fields when using the 'Advanced' Formatted text parser. Include <footnote> tags in the text to automatically create footnotes: {{{ Click here to win<footnote>Terms and Conditions apply</footnote> }}} The content of the footnote can be formatted too by including formatting tags within the <footnote> tag.	
	Activation modification to show the response received from the server	
2626	Activation modification to show the response received from the server if HTML is received. This should help users identify whether a web proxy or firewall is intercepting the activation server request.	2020-06-17
	Modification to user defined parameters to allow options to be automatically added and displayed in a drop down menu.	
2622	Modification to user defined parameters to allow options to be automatically added and displayed in a drop down menu. <code>SELECT * from images where path = '{{PATH: [[SELECT DISTINCT(path) from images]]}}'</code>	2020-06-15
2619	require LINK.delete(deleteLinks); and EC panel menu 'Delete all links' to execute external script	2020-06-04
2613	Add right click 'copy field name' menu option.	2020-05-26
	Enhanced logging when 'Multiple Users Share this Workspace' is on	
2610	Enhanced logging when 'Multiple Users Share this Workspace' is on - a log file containing the user's computer name will be created instead of logging directly into "EasyCatalog Log.txt" to prevent multiple users logging to the same file at the same time.	2020-05-18
2607	Added a nw fitting option to the tag_ fitting = "contentaware"	2020-04-30
2605	The versions panel add 'adopt fields->all and adopt fields->current layer' operations	2020-04-29
2604	Add lua getactivedocname() and getdocname() methods to document object	2020-04-28
2587	DATASOURCE.getoption now retrieves data source settings	2020-03-31
2586	Versioning now supports linked text frames	2020-03-30
	Lua cell enhancements	
2572	Added colspan_ rowspan and setscriptlabel methods.	2020-03-05
2573	FIELDSTR can now be passed {{KEY}} to return a records key field value	2020-03-05
2571	Support for encrypted data source templates	2020-03-03
2566	Added "clippingpath" attribute to an tag so the "photoshop" clipping path can be specified.	2020-02-26
	Added new custom field dependency checking	
2556	Added new custom field dependency checking which gives a more indepth error message showing the path the custom field parser took through the fields before hitting the circular dependency. Users can switch back to the old dependency checker by turning off the "Enhanced Dependency Checking" advanced preference.	2020-02-21
	Added support for GS1 Data Matrix barcodes	
2557	Added support for GS1 Data Matrix barcodes: prefix the data to be encoded with a tilde (~) character.	2020-02-21
2551	Hyperlinks now work if the destination page number contains whitespace	2020-02-18
	Modification to Offline Activation dialog	
2548	Modification to Offline Activation dialog to take user to web page to activate. Also added validation to prevent .lic file from being generated when no serial numbers have been entered.	2020-02-13
2533	Added support for saving get contents to a file using HTTP.get()	2020-01-21

2534	The activation files '.lic' and '.elic' will now use the user's machine name as their default names	2020-01-21
2530	Startup About dialog now only appears when all modules are unregistered	2020-01-17
2520	Enhancements to Master Based Pagination	2020-01-06
	Added an option to "Override and Detach" items during pagination do the link the master item is broken. Improvements to the handling on Unused positions	
2518	Versions panel now reflects the document selection into the panel	2019-12-18
2511	createformattedcontent.lua now allows access to all Lua objects and methods.	2019-12-16
2503	Added the ability to "Ignore Versions" to the Versions Panel	2019-12-03
2502	Dragging a single record to a page item now ignores the "Position Index" pagination rule	2019-12-02
2498	Enhancements to img src tags	2019-11-25
	if the scheme of an image is echttp or echttps then the image will be placed as a Live URL link in 2020 and above.	
2483	Added new update option for tabular fields.	2019-11-11
	A new "Rebuild From Formatting Rule" option has been added to Table->Table Options. This allows the table to be rebuild using the contents of a Formatting Rule.	
2482	Changed the maximum image preview size from 255x255 to 500x500	2019-11-08

EasyCatalog > Custom Field Commands

ID	Summary/Description	Date
2672	Added a new command - IMPORTFILE to load the text content of the given file into a field	2020-09-03
2658	Added "GROUPSNIPPETWIDTH" custom field command	2020-08-14
2660	Added "SNIPPETDIMENSIONS" custom field command	2020-08-14
2576	GROUPMIN/GROUPMAX will now output an empty value if 'ignore empty fields' is on and all fields in the group are empty	2020-03-16

EasyCatalog - LUA Commands

ID	Summary/Description	Date
2589	added CELL.getwidth and CELL.copyformatting methods	2020-04-08
2553	Enhancements to TEXT.inserthyperlink	2020-02-20
	Now can support page or url based hyperlinks and specify a hyperlink legend	
2545	DATASOURCE getoption now works for XML based data sources	2020-01-31
2515	LUA 'post' now accepts HTTP header table as third parameter	2019-12-17
2508	Rationalise methods for object positioning on the FORMATTINGRULE object	2019-12-10
	align_alignededges and arrange now have added flexibility in the ability to take a table of frames or a table of groups of frames. Deprecetated older functions as these are now consistent and simpler to use.	
2506	FORMATTING rule object enhancements	2019-12-06

	Deprecated positionframes in favour of a new function "packintorows" which is more versatile	
2494	inserthttpimage now applies the correct autofit options	2019-11-22
2490	Addede distinctbodyrows to the TABLE object	2019-11-18

EasyCatalog - File Data Provider > Google Sheets

ID	Summary/Description	Date
2574	Increased number of spreadsheets available for selection to 1000	2020-03-09
	Increased number of spreadsheets available for selection to 1000 (previous limit was 100).	

EasyCatalog - Pagination Module

ID	Summary/Description	Date
2684	Added new Pagination Rule "Action": "Keep With Next"	2020-09-23
	Added new Pagination Rule "Action": "Keep With Next". This overrides the "Keep With Next" attribute specified by the regular attribute_ and can be applied selectively based on the result of an action.	
2637	Added "Apply Swatch to Text Stroke" Pagination Rule	2020-07-09
	Added "Apply Swatch From Field to Text Stroke" Pagination Rule	
2628	Added "Frame Width To Content Width" fitting option	2020-06-19
	Added "Frame Width To Content Width" fitting option to the Pagination Rules panel.	
2615	Added 'Apply Swatch to Text From Field' Pagination Rule	2020-05-27
2579	"Asset Name" option is now case insensitive	2020-03-18
2535	Snippet Folder can now contain aliases to snippet files	2020-01-21
	Snippet Folder can now contain aliases to snippet files. See #2529	
2529	Added "Snippet Folder" to option to Pagination dilaog	2020-01-16
	Added a new option the Paginate dialog to allow the user to select a folder containing .idms Snippet files. All snippet files in this folder will be available for pagination in the same way as a pagination library. Pagination Rules should still be applied to the boxes before creating the snippet files.	

EasyCatalog - Pagination Module > Flow-based

ID	Summary/Description	Date
2676	Now calls auto page insertion at the end of flow-based pagination	2020-09-08
	Now calls auto page insertion at the end of flow-based pagination to ensure all pages have been inserted	

EasyCatalog - Pagination Module > Formatting Rules

ID	Summary/Description	Date
2630	Added checkable menu option to book panel "Update" menu: "Update Formatting Rules"	2020-06-22

Added checkable menu option to book panel "Update" menu: "Update Formatting Rules". This will also update any placed Formatting Rules when updating the books in the document. This option will not update the formatting rules themselves in each document_ use the "Synchronize Formatting Rules" option to achieve this_ then use Update Document.

EasyCatalog - Enterprise > Sales Layer

ID	Summary/Description	Date
2667	Now looks for categories aswell as catalogue nodes	2020-08-24

EasyCatalog - Relational Module

ID	Summary/Description	Date
2575	Added support for Alt-clicking on filter button	2020-03-09
	Added support for Alt-clicking on filter button to "Show All"	

EasyCatalog - Scripting Module

ID	Summary/Description	Date
2666	Add additional options to script function myEasyCatalog.setVersionPreferences_ new optional params (Versioning Method_ Morph Option and Common Layer Enabled)	2020-08-20
2653	require new script command to get version slot frames	2020-08-05
	require new script command to get version slot frames_ example: var myEasyCatalog = app.easycatalogObject; var myFrames = myEasyCatalog.getVersionSlotFrames(app.activeDocument_ "0601NYE" "002:::2");	
2652	new script command to reorder columns alphabetically_ dv.reorderColumns()	2020-08-04
	required_ new script command to reorder columns alphabetically_ example: dv.reorderColumns()	
2624	fieldContent now returns a string version for tabular field types	2020-06-15
2544	Added updateDocumentSelection to the easycatalogObject	2020-01-30
	Added updateDocumentSelection to the easycatalogObject. This version of the method updates fields across all data sources in the document selection. As InDesign Server doesn't have the concept of a 'selection'_ this method is only of value to scripting in the desktop version of InDesign.	
2543	Added updateDocumentSelection to the datasource object	2020-01-29
	Added updateDocumentSelection to the datasource object to update the fields in the document selection. As InDesign Server doesn't have the concept of a 'selection'_ this method is only of value to scripting in the desktop version of InDesign.	
2521	loadFieldDefinitions now takes either a full path or a File object	2020-01-07
2485	added removeCustomField to the Datasource object	2019-11-14
	Added ability to remove a custom field	

Bug Fixes

The following bugs have been fixed in this release of EasyCatalog. For clarity, the bug reports listed below show the original problem as reported. It is often not possible to detail the fix for each issue as they involve internal changes to EasyCatalog. Note that some bugs listed here refer to issues that were encountered with new features in the beta version by our beta testers and are included here for completeness.

EasyCatalog

ID	Summary/Description	Date
2691	Pagination options are being written to "Open Panels" configuration file	2020-10-14
2692	Pagination.xml not being updated when applying a configuration file that contains Pagination Options	2020-10-14
2690	Crash when outputting HTML where last cell in row contains a colspan	2020-10-13
2685	HTML tables not being rendered correctly when cells contain both cell span and row span attributes	2020-10-01
	HTML tables not being rendered correctly when cells contain both cell span and row span attributes. The span is sometimes applied to the wrong cells_ and cell content appears in the wrong cells.	
2681	Image rotation is applied after alignment	2020-09-18
	Image rotation is applied after alignment_ which means images that should be centred in the box are not.	
2680	HTML Parser now removes linefeeds from node content when allow all whitespace is disabled	2020-09-17
2677	Empty 'some fields were not updated as they are from another data source' error	2020-09-09
2673	EasyCatalog for InDesign Server showing incorrect registration status at startup	2020-09-04
2671	HTML table containing both a row and cell span in the same cell not applying rowspan	2020-09-02
	HTML table containing both a row and cell span in the same cell not applying rowspan: {{{ <td colspan="2" rowspan="2">abc</td> }}}}	
2657	Update Panel > With Page Numbers now uses document's measurement system	2020-08-13
	Update Panel > With Page Numbers now uses document's measurement system rather than mm.	
2654	URL (Live) images always being re-imported during "Update Document"	2020-08-11
2655	Added 'frame' based versioning to the versions panel	2020-08-11
	Now provides an alternative versioning method that versions based on frames rather than the fields the frames are on. This is currently tied to master based pagination_ which dictates the location of the assets that contain frames and the fields used to determine which asset to use for a slot.	
2649	Table > Filter... now works on Matrix tables	2020-07-29
2648	Adopting XML tags using LUA script not working on Windows	2020-07-24
2645	EasyCatalog Apple script 'generate record report' does not recognise 'file type(xml/csv)'	2020-07-21
2640	Alt dragging from Formatting Rules Panel	2020-07-14
	Alt - dragging now places the formatting rule when "Populate on Drag And Drop" is enabled. This is consistent with library drag behaviour.	

2638	Record Viewer now remembers previous selection	2020-07-10
	Record Viewer now remembers previous selection settings when hidden and displayed again. Previously it would revert to range	
2631	Cells not merging vertically when rows are automatically deleted from the table	2020-06-23
	Cells not merging vertically when rows are automatically deleted from the table using the 'delete when empty' row option.	
2632	Image previews not being downloaded in tooltip	2020-06-23
	Image previews not being downloaded in tooltip when "Download Image Previews" advanced preference is set	
2629	UPCA barcodes are outputting the wrong check digit	2020-06-19
	UPCA barcodes are outputting the wrong check digit when using the "UPCA" barcode type (outputting the barcode using a graphic box).	
2627	Fixed issue persisting Rule Set contents to Interchange format	2020-06-18
2620	Crash when synchronizing with data source	2020-06-10
	Crash when synchronizing with data source if "Multiple Users Share This Workspace" is on and the configuration has changed so that there are fewer fields in the Fields.xml configuration file than the local snapshot.	
2621	Fields are not always correctly inserted into table cells	2020-06-10
	Fields are not always correctly inserted into table cells - sometimes the end marker can be missing	
2617	UPCA barcode type field option being lost when data source is closed and re-opened	2020-05-28
2618	Fixed issue with the Enhanced HTML parser that would cause a crash when "Embed Tags In Conditional" text was enabled	2020-05-28
2612	Added scripting calls to export and import an offline activation file	2020-05-21
	Added scripting calls to export and import an offline activation file: {{{ app.easycatalogObject.exportOfflineActivationFile("ECSR000-0000-0000-0000-0000" _ File("~/Documents/Server.lic")); }}} {{{ app.easycatalogObject.importOfflineActivationFile(File("~/Documents/Server.lic")); }}}	
2609	URL(Live) would not correctly evaluate expressions in the location field option	2020-05-12
2606	Auto Pickup showing wrong error message	2020-04-29
	Auto Pickup showing wrong error message: showing 'no fields specified' instead of the 'key fields not specified' error	
2603	Various enhancements to improve data manipulation	2020-04-27
	Added support for 'createcontent.lua' To support this_ new commands have been added to the RECORDSET object addfield addrecord removefield renamefield	
2595	Allow formatting rules to be re-ordered via drag & drop.	2020-04-20
2596	Export/import version preferences set default folder location as 'Documents'.	2020-04-20
2594	create new LUA method base64encode(s)	2020-04-16
2592	New EasyCatalog scripting object method setVersionPreferences	2020-04-14
	EasyCatalog scripting object_ add setVersionPreferences(document_ version_field_ match_fields_ base_version_name_ ignore_versions); ec.setVersionPreferences(app.activeDocument_ "t_Version" _ "t_PageNumber_cn_BoxNumber" _ "Common" _ "");	

2593	Add new method obj.setVersionDatasource(doc_ datasource);	2020-04-14
	EasyCatalog object for scripting_ add new method obj.setVersionDatasource(doc_ datasource);	
2591	Add right click option for data panel_ 'Sort by Appearance'_ sort columns by appearance script content.	2020-04-09
2590	tabular fields now ignore whitespace when checking updates	2020-04-08
2588	Versions palette requires horizontal scroll bars	2020-04-01
	Add horizontal scroll bars to ECAT Versions palette	
2585	Create Merged Document bug fixes	2020-03-26
	Sometimes section starts would be remove incorrectly during pagination	
2582	Position based Pagination Incorrect positioning	2020-03-24
	Frame wrapping could sometimes case incorrect positioning of objects.	
2581	[LITE] URL-based images are now automatically downloaded when using "Synchronize with Data Source"	2020-03-23
2580	[Lite] Images are not being downloaded from URL before "Create Merged Document"	2020-03-20
2570	Fields in page Furniture are being ignored when using Update Panel > With Page Numbers	2020-03-03
	Fields in page furniture are being ignored when using Update Panel > With Page Numbers	
2569	new tag_ fitting added to allow "frametocontent"	2020-03-02
2562	document:getpagepositions not including picture boxes	2020-02-24
	table = document:getpagepositions(thisdatasource_ 'all'_ 'any'_ 'page'_ "cm"; bug only includes text frame_ picture frames are excluded.	
2563	[Marketer's Studio]Space usage report sometimes truncated	2020-02-24
2554	Circular Dependencies not being shown in panel	2020-02-21
	Custom field circular dependencies are not being shown in panel	
2555	Right click > Copy option does not copy custom field error to the clipboard	2020-02-21
2549	Fixes potential crash when using tables within tables_ and the anchored table is the first character in a cell	2020-02-14
	Fixes protential crash when using tables within tables_ and the anchored table is the first character in a cell. This was reported as a crash in Remove Field Markers_ although it could affect the CELLSTR command and Update Document.	
2540	Added a "Preprocessing" field option	2020-01-29
	Fields can now be pre-processed before regular formatting is applied. Built in preprocessing engines allow the parsing of JSON field content using either Mustache_ Lua or JMESPath.	
2537	'Missing' image not being imported when URL(Live) image cannot be imported	2020-01-28
2538	Crash when exporting Formatting Rules to IDML document	2020-01-28
	Crash when exporting Formatting Rules to IDML document if the Rules have somehow been deleted from the document. This will only occur when there's mismatch of what the plug-ins are expecting to be in the Formatting Rules list and what's actually still there.	
2536	URLs containing non-Latin characters are not being downloaded	2020-01-24

	URLs containing non-Latin characters are not being downloaded when using the URL(Live) Picture Content option.	
2531	Replacing content in a cell can sometime affect the adjacent cell	2020-01-17
	If all of the text is selected in a cell and the user inserts a field_ sometimes the field content ends up in the adjacent cell. This is the case when our table attribute character has somehow moved to the end of the table cell's text.	
2527	Added new button to the Versions panel	2020-01-13
	Added a paginate button to the versions panel that paginates the selected items using the current pagination settings. If the item is already paginated_ then it is repositioned on the page to where it would be paginated.	
2523	lua command to get page positions via DOCUMENT object	2020-01-10
2524	lua command to export ECHTMLTable as Excel	2020-01-10
2525	Post processing of Formatting Rules now supports flows based pagination	2020-01-10
2526	Offline-activated licenses are sometimes attempting to re-activate on the server	2020-01-10
2509	Removed limit of 80 characters in the filter dialogs	2019-12-10
2507	FIELD.get() now returns an empty table if there is no content in a HTML derived tabular field	2019-12-06
2504	Numeric fields with empty values are not grouping and sorting correctly in the panel	2019-12-04
	Numeric fields with empty values are not grouping and sorting correctly in the panel - for example_ grouping by field that contains: {empty}_0_1 can result in the records containing an empty value being randomly interspersed with the records containing 0.	
2505	Issue with the Matrix Table dialog causing the application of invalid setting	2019-12-04
2499	Fixed crash showing previews in the Versions panel	2019-11-26
2491	"Apply Swatch Named In" is not accepting CMYK values	2019-11-20
	"Apply Swatch Named In" is not accepting CMYK values in the form: cNNNmNNNyNNNkNNN e.g. c100m100y0k0	
2492	"Hide Empty Fields" should be "Hide Empty Columns"	2019-11-20
2493	"Unknown Server license" error appearing in Server error log	2019-11-20
2486	Update Panel with Page Numbers and Update Panel With Page Positions fail if there is a significant number of documents in the book	2019-11-15
	Update Panel with Page Numbers and Update Panel With Page Positions fail if there is a significant number of documents in the book. These two options now close each book document after they have been processed.	
2487	Progress bar does not always reflect amount of work already completed	2019-11-15
	Progress bar does not always reflect amount of work already completed - i.e. it can move slower than it should when processing large stories_ and faster than it should when processing small stories.	

EasyCatalog > Custom Field Commands

ID	Summary/Description	Date
2678	Records not being listed in data source order in XREFFIELDLIST	2020-09-09
	Records not being listed in data source order in XREFFIELDLIST. This fix is a general bug that means that records are not always processed by some commands in the order that they appear in the data source.	

2659	Added "GROUPSNIPPETDIMENSIONS" custom field command	2020-08-14
2565	ROUNDVAL is rounding negative values to positive ones	2020-02-26
	ROUNDVAL is rounding negative values to positive ones.	
2496	Field names containing colons cannot be referenced in group or sort paths	2019-11-25
	Field names containing colons cannot be referenced in group or sort paths. Modification required to escape them by doubling them up -- e.g. the field {{{ attributes::size }}} would be referenced using: {{{ attributes:::size }}}	

EasyCatalog - LUA Commands

ID	Summary/Description	Date
2695	Crash using 'sortrows' lua command	2020-10-20
	Crash using 'sortrows' lua command when sort columns in the table do not exist	
2623	Added getstyle() to the CELL object	2020-06-15
